

Cloud Library for Mac/PC

Installing the App

- Navigate to **www.yourcloudlibrary.com** in your web browser.
- Click “Available for Mac OS” or “Available for Windows”, according to your operating system.
- Click “Download the App” and install.
- Launch the app by clicking the Cloud Library icon.
- Select your Country as “Canada”, Province as “ON” and Library as “Oshawa Public Libraries”.
- Enter your Library Card Number and Password, and accept the licence terms to log in.

Tip: If you have never before set a password for your card, this should be set to the default value ‘1234’.

- Click “Activate” to automatically generate an ID.

Downloading Books to Your Computer

- Browse featured titles on Cloud Library’s Featured lists, or click the “Browse” tab to choose specific categories that interest you. Alternatively, click “Search” to find specific authors or titles.
- When you find the book you’re looking for, tap its cover to see its details and availability.
- If the title is available, press “borrow” to add it to your library and view it immediately. If it is currently unavailable, you can place a hold by pressing “hold”.

Transferring Books to an E-Reader

- To transfer a downloaded eBook to your eBook Reader, connect your device to the computer, navigate to the Cloud Library app’s “MyBooks” screen and click the green “Transfer to Device” button located over the desired book. This button will appear only when a compatible device is connected in transfer mode.

Refining Your Search

- Press the Browse button followed by “Filter” to select titles which match your criteria. You can limit your search to eBooks, to Audiobooks, or exclusively to titles that are currently available for immediate loan.
